## Message from the organizing chairman & president

The objectives of the society is to promote and advance the knowledge in the aspect of parasitology and tropical medicine with particular reference to Malaysia and the world in global.

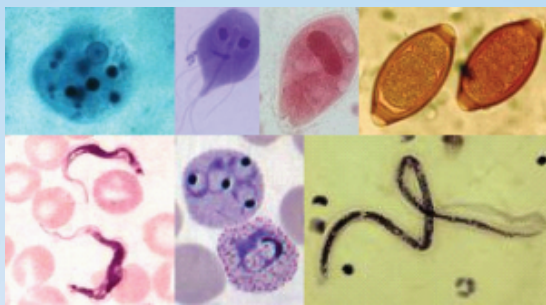

As president and chairman of the 46<sup>th</sup> Annual Scientific Conference, I invite all members to meet for the 46<sup>th</sup> times. The theme chosen is “Infectious Diseases: from Epidemic to Pandemic”.

For 2010, it is very timely due to the rapid spread of tropical communicable and zoonotic diseases. The society encourage members to present their research findings and to share their valuable knowledge with the fellow members and foreign guests. We also encourage non-members for active participation in this national conference. The highlight of the 2-day conference will be the panel discussion on the focused theme and the student presentation awards.

I take this opportunity to thank each and everyone for the kind support, active participation and the networking among researchers and wish you “Selamat Datang” to Kuala Lumpur, Malaysia. We hope the deliberations will pave a way to a greater understanding of the challenges that lie ahead on epidemic and pandemic diseases affecting the world in the current century.

**Associate Prof. Dr. S. Vellayan**
